Experience

Network Engineer / System Administrator - Freelencer **Jan 2026 - Present**
Self Employed Remote / Local
Fiverr

Freelanced in IT, setting up and configuring **networks and servers** in homelabs for **reliable access and performance**. Worked extensively with **computer hardware**, including **servers, desktops, and laptops**, ensuring optimal setup and maintenance. Deployed and managed **Home Assistant, game servers, and various services in Docker** for enhanced functionality. Provided **consultation on network and system security**, implementing measures to protect against threats and improve system resilience on platforms **Fiverr** and **Upwork**, with **5 star** rating .

Network Engineer & Operations associate **Oct 2025 - Nov 2025 (1 Month)**
Wock Oliver Remote

At Wock Oliver, I managed day-to-day IT operations, supporting SaaS administration and ClickUp setup, and administering Microsoft 365 for user onboarding. I also assisted with mail deliverability by monitoring email performance and troubleshooting deliverability issues to ensure reliable communication, coordinating support to keep services running smoothly.

Network Engineer **April 2025 - July 2025 (4 Months)**
Bout International Mohali, Punjab

As a Network Engineer, responsible for maintaining company **network and computer systems**, ensuring optimal bandwidth, and **applying updates policy**. Provides **technical support for users**, **troubleshooting connectivity issues**, and managing **firewall configurations** to safeguard company data. Ensures smooth network operation and efficient workflow across the organization.

System Engineer Support - Intern **Jan 2024 - Mar 2024 (3 Months)**
Cyberrack Systems Hydrabad, Remote

Configured and managed **Linux system services**, including **Apache2, Nginx, SSH, and MySQL**. Assisted in **server administration, user management, and system performance tuning**. Automated routine tasks using **Bash scripting** and handled **log analysis** for troubleshooting. Worked on **firewall configurations (iptables)** and basic **network diagnostics** using tools like **netstat and tcpdump**.

Projects

DeBloat Project **Jan 2026 - Present**
https://debloat.tech

I am an creator and active maintainer of **DeBloat Project**, a user privacy respecting, self-hosted services, alternative to big tech companies, provinding services like **Mail, Cloud, Docs,** and **Search** etc..., Hosted using modern self-hosting stack, using industry grade technologies like **docker, k3s kubernetes distribution.** Working upon different skillets, **Administrating Linux Servers, Email Deliveribility and Security, Distrubuted Systems, and Backing up systems.** Handling more than 25 users with fully reliable services.

Projects Securing Linux servers best practices and advanced techniques. **Aug 2024 - Nov 2024**

We have implemented a robust security framework to protect **Linux servers** against modern threats. The framework incorporates industry best practices and **advanced security techniques**.

Implementing and Simulating an Active Directory Lab in VirtualBox **Mar 2024 - Dec 2024**

I have implemented a virtualized **Active Directory** environment in **VirtualBox**, configuring **AD DS**, domain controllers, and Group Policy for user and group management. Implemented **DNS** and **DHCP** services for network management and ensured proper name resolution and IP allocation. Troubleshot and resolved **replication** and **user access** issues, ensuring the security and reliability of the AD infrastructure.

Skills

Networking, TCP/IP, DNS, VPN, Routing & Switching, Network Design, Network Security, Security Protocols, Firewalls, VPN Configuration, Operating Systems, Linux (Ubuntu, CentOS), Windows Server, Windows Desktop, System Administration, Active Directory, Virtualization, Bash, PowerShell, Python, Wireshark, Cisco Packet Tracer, GNS3, Analytical Thinking, Problem Solving, Team Collaboration, Communication.

Education

Chandigarh University **Aug 2021 - May 2025 (passout)**
Information Technology Bachelors of Engineering
Mohali, Punjab

Sri Surya Jr. College **Aug 2019 - Mar 2021**
PCM Intermediate - 12th
West Godavari, Andhra Pradesh

Certifications

System Administration and IT Infrastructure **July 2023**
Google

Network Defense Essentials (NDE) **July 2023**
EC - Council

Networking Essentials **Nov 2024**
Netcad Academy Cisco

JNCIA-Junos **Mar 2026**
Juniper Networks

Fortinet NSE 2 Certified in Cybersecurity **July-2026**
Fortinet
https://www.credly.com/badges/a0d88d94-4e42-4...

Activities

- An active member of **IEEE** and **CIS CUSB** Club in University
- An active contributer to **Open-Source projects** through **coding, bug fixes, and feature improvements.**
